

High-quality filter paper.

With their special fold design, ORIGINAL air filters guarantee an unobstructed inflow of dust-laden air into the folds. The special fold geometry prevents the filter paper surfaces from coming into contact with one another. The evenly spaced pores ensure a high standard of dirt separation.

Your benefits:

- Long replacement intervals
- Optimised filter performance
- High engine protection

Impregnation of filter paper.

By impregnating the filter, the unit is optimally protected against mechanical, thermal and climatic influences, and also operating fluids.

Your benefits:

- Inhibits moisture uptake
- Ensures lasting robustness

Custom-fit seal.

Even the most minor of seal integrity defects between the seal and filter housing can allow dirt to enter the engine unit directly, causing wear. A seal that remains perfectly intact after many hours of operation will increase the engine's service life.

Your benefits:

- Long service life
- Optimal engine output

Optimal purification performance.

Up to 99.9% of all particles are filtered out. The virtually particle-free intake air increases the service life of the engine in all conceivable dust conditions.

Your benefits:

- Long service life of the engine

Filter service life.

Thanks to the ingenious fold geometry of our filters, a large filter surface area can be incorporated into an extremely small space. Our filters feature a high dirt uptake capacity and boast long replacement intervals.

Your benefits:

- Long element service life
- Low operating costs

Customized.

CLAAS ORIGINAL parts are precision-manufactured, high-quality series components for CLAAS machines.

Reliable.

CLAAS ORIGINAL parts have a longer life cycle and protect the machine from mechanical failure.

Efficient.

CLAAS ORIGINAL parts are renowned for their high cost-effectiveness, and quality that pays off.

Why CLAAS ORIGINAL air filters?

ORIGINAL air filters protect the engine from contamination, ensure long periods of operational reliability and are tailored perfectly to the CLAAS machine's performance characteristics. Our filters undergo continuous enhancement and refinement to keep pace with the rising performance capabilities of our machines. ORIGINAL filters are tried and tested in genuine harvesting conditions on location from as early as the development phase, and are specially tailored to the individual CLAAS machine. ORIGINAL air filters offer you:

- High-quality filter paper
- Seal integrity
- A custom-fit seal
- Perfect fit of filter element
- Optimal purification performance
- Long filter service life

ORIGINAL parts offer you more than just the right dimensions. The materials and manufacturing methods we use are fundamental to the reliability and long service life of our machines.

Our ORIGINAL parts are manufactured from materials of an exceptionally high quality and to precise CLAAS specifications on the basis of proven CLAAS expert knowledge. Each and every part is tailored to the machine as a whole.
